UNIVERSITY OF WASHINGTON  
**EMPLOYEE VERSUS INDEPENDENT CONTRACTOR  
 CLASSIFICATION CRITERIA**

An independent contractor is an individual (or non-corporate business entity) that provides personal services to the University in such a manner as to be free from University control over performance. Typically, the independent contractor will have a principal place of business other than at the University, has a business license, and offers services to the general public. External consultants are independent contractors who provide professional advice.

The following criteria are used by the Internal Revenue Service to classify individuals as either independent contractors or employees. No single criterion or group of criteria will provide a definitive determination. The criteria are used in combination to obtain an overall indication of how the individual should be classified. **[A "Yes" response to the questions tends to either strengthen or weaken the case that the individual is an independent contractor.]**
